Registered Charity Number 1171916

# HELLO AND WELCOME

Sarah White, UKHarvest Kitchen manager (left)  
Yvonne Thomson, CEO and Founder of UKHarvest (right)

We are so glad that you've received this booklet! Throughout you will find tips, hints and tricks to fight food waste at home along with some delicious food waste friendly recipes for you to try out! This resource has been supported by West Sussex Recycles who are keen to support communities across the county to reduce their food waste and combat climate change. We are so grateful to West Sussex Recycles for making all of this possible.

“An important element of our Council Plan is to protect the environment by reducing the amount of waste we have to process, so tackling food waste and helping people find ways to reduce the amount of food which ends up in the bin is critical.

At a time when many people are facing significant cost-of-living pressures we're pleased to be supporting UKHarvest and we hope you find the recipes, tips, and advice in this booklet useful.”

-Deborah Urquhart, Deputy Leader and Cabinet Member for Environment & Climate Change

## WHAT'S IN THIS BOOKLET?

Introduction and information on food waste .....	2
How to save some of Britain's most wasted foods .....	3
Meal planning and smart shopping .....	4
Making the most of your shop .....	5
Storage and food safety .....	6
Seasonal eating .....	7 - 8
Food savvy recipes and cooking tips .....	9 - 10

# WEST SUSSEX COUNTY COUNCIL AND UKHARVEST PARTNERSHIP

UKHarvest is a not-for-profit environmental charity whose mission is to eliminate hunger and food waste. We enrich our communities by redistributing quality excess food to those in need.

In a bid to tackle food waste, West Sussex County Council is once again teaming up with Sussex based food rescue charity UKHarvest, to run Community Food Hubs and provide education on food waste prevention.

Since October 2022, UKHarvest has worked in partnership with West Sussex County Council to encourage people to take advantage of surplus food rescue services, which in turn works to reduce the amount of edible food that ends up in people's household bins.

## INTRODUCTION TO FOOD WASTE

**The average family of 4 can save £80 a month\* by reducing their food waste.**

**40% of the average West Sussex rubbish bin is food waste.**

**A staggering 27.7% of this is edible food and could have been eaten!**

\*source: <https://wrap.org.uk>

# HOW TO SAVE SOME OF BRITAIN'S MOST WASTED FOODS

**2.9 million potatoes are wasted everyday! This is the equivalent of wasting 50% of all potatoes bought.**

Our waste prevention tips:

- Don't store with onions! If they start sprouting, remove the sprouts and use the potatoes as normal.
- Parboil or mash then freeze.
- All the nutrients, fibre and flavour is in the skin - don't peel them but be sure to clean them thoroughly.

Quick & Easy Recipe - Potato Peel Chips:

If you can't resist peeling, don't throw the peels away!

1. Place peels from 1kg bag of potatoes in a bowl with 1 tbsp of oil (any), a quarter tsp of salt and a quarter tsp of paprika or any seasoning of your choice.
2. Mix and spread out on a baking tray. Bake at 180°C for 10 - 12 minutes until crispy.

## 20 million slices of bread are wasted each day!

Why not try?

- Making bread recipes. (breadcrumbs, croutons, bread pudding, French toast)
- Freezing, to extend its life.
- If stale, sprinkle with water and pop in a warm oven for 2 - 3 mins.

Quick & Easy Recipe - French Toast:

Perfect for using stale bread as fresh bread will fall apart.

1. To make 4 slices, crack 2 eggs in a bowl with 3 tbsp of milk, whisk together.
2. Coat each slice of bread in the mixture on both sides then fry over medium heat until golden brown.

**1 million bananas are wasted daily in British households.**

Our top tips:

- Firstly separate from each other for storage.
- As they start to turn speckled and brown...you guessed it - FREEZE THEM!
- If they turn completely black, even better, as this is ideal for making many banana recipes.
- Check out some of our fantastic banana skin recipes!

Quick & Easy Recipes ideas:

1. Frozen banana and peanut butter smoothie.
2. Banana muffins.
3. Banana skin cake.

## Save our milk from going down the drain!

"Encourage children to only pour the milk they need on their cereal in the mornings and remember, shut the fridge door when grabbing the milk"

-Donna, Community Engagement and Events Manager

"I like to pour milk into an ice cube tray, freeze it and then pop out a cube into my morning coffee. It's just the right amount and stops any being wasted. YES, you can freeze milk!

-Jo, PR Coordinator

# MEAL PLANNING AND SMART SHOPPING

Our top food waste prevention tip is to meal plan!

It is not only good for the planet, but it is also good for your purse. Most households waste the equivalent of 8 meals a week, meal planning could save you money and avoid waste!

## 1. CHECK YOUR DIARY

Check your diary and plan for the meals you will definitely cook.

## 2. WHAT'S IN THE FRIDGE?

Check the fridge, even take a photo before you go shopping to avoid buying food you already have.

## 3. LOOK IN YOUR CUPBOARDS

Look in your cupboards and see what you already have. Make a list before you shop!

## 4. FIND RECIPES

Find new ideas for healthy and low cost meals, remembering [The Eatwell Guide](#) when planning nutritionally balanced meals. If you can, batch cook for the week ahead and make the most of storing and freezing.

## 5. BE A SMART SHOPPER

Copy our template below to plan your meals or [download the full version here!](#)

MONDAY	FRIDAY	SHOPPING LIST
TUESDAY	SATURDAY	
WEDNESDAY	SUNDAY	
THURSDAY	NOTES	

# MAKING THE MOST OF YOUR SHOP

## FREEZE WITH EASE

- By freezing excess or nearly out of date food in the freezer, it will last longer. Did you know you can freeze eggs, yoghurts, milk and cheese?
- Check out [www.freezeit.co.uk](http://www.freezeit.co.uk) for advice on how to prepare, store and freeze hundreds of food items.

## LOVE WONKY VEG

- Fruit and vegetables that are misshapen often get left behind, but they all taste equally delicious. Embrace their uniqueness! Check out the wonky veg bags at your local supermarket, the more wonky veg we buy, the more supermarkets will accept imperfect produce from our farms.

## DITCH THE PEELER

- There is so much nutrition in the skins of carrots, potatoes and many other vegetables – don't peel them! Simply scrub and clean your vegetables and use everything – even the carrot tops in soups and salads.

## LOVE YOUR LEFTOVERS

- Turn leftovers from meals into something different the next day. For example, roast chicken into quesadillas and roasted vegetables into a frittata.
- Use up what you already have before you go shopping. You can take leftovers for lunch, make soup from spare vegetables or banana bread from overripe bananas – get creative and love your leftovers!

# TIPS TO FIGHT FOOD WASTE

## BATCH COOK

- When planning meals, aim to cook a big pot of stew or soup, or make something in a slow cooker, even a whole chicken, then portion it up and freeze. This way, nothing is wasted, and can also provide a few meals.

## WRITE A SHOPPING LIST

- Make a list of the required ingredients to buy at the supermarket. This makes sure you only buy what you need and avoid getting tempted by in-store offers.

## SUBSTITUTE INGREDIENTS FOR WHAT YOU HAVE

- Use recipes as a guide and tool of inspiration. If the recipe is asking for kale but you have spinach, don't be afraid to swap them. You can't go wrong by swapping out things like leafy greens, starchy carbs or even spices – you never know, you might come up with something amazing!

# STORAGE AND FOOD SAFETY

Storing your food in the correct place is important, especially within your fridge as it will help it stay fresher for longer. Your fridge should ideally be between 3 - 5 degrees Celsius. There is a temperature difference between the top and bottom shelves so knowing what to put where will make a difference:

## TOP AND MIDDLE SHELVES

The very top of your fridge will always be slightly warmer than the bottom. The upper shelf is best for anything that doesn't need cooking. For example, cooked meat, fish and dairy products, such as cheese, butter and yoghurt.

## DOORS

The warmest storage point of any fridge, they're best reserved for items with natural preservatives, like jams, chutneys, salad dressings and juices. Anything with high levels of vinegar, salt or sugar too (think items that only require refrigerating once opened).

## BOTTOM SHELF

The coolest part, this where you keep raw foods like raw meat and fish. Keep items wrapped, in their original packaging or even on a plate to prevent any juices from dripping and help reduce the risk of cross-contamination with other foods.

## BOTTOM DRAWERS

Best for ready-to-eat fruit and vegetables.

## 'EAT ME FIRST' SHELF

Having an 'eat me first' shelf or section in your fridge can work wonders for knowing what foods are nearing their use by dates and should be eaten soon.

Visit [lovefoodhatewaste.com](http://lovefoodhatewaste.com) for tips on storing food.

## BEST BEFORE AND USE BY DATES

Knowing the difference between best before and use by dates is really important for your safety and helping you reduce your food waste.

Use by dates are about safety. This is the most important date to be aware of. Foods can be eaten before the use by date, but not after.

Best before dates are about quality. The food is fully safe to eat past this date, but it might be past its best. This means its texture, flavour or appearance might not be as good as it once was, but it is completely safe to eat. Use your senses, such as smell, to test!

## TOP TIP:

Freeze food on or before it's USE BY DATE to prolong the lifespan of the food for another 3 - 6 months.

# SEASONAL EATING

Much of the fresh produce in supermarkets is imported. Eating seasonally benefits your health, the environment, and your wallet, as local produce is often fresher and cheaper.

# FOOD SAVVY RECIPES & COOKING TIPS

Find our flexible, easy and healthy recipes by following this link to our website. All our recipes feature great ways of using up some of the most wasted foods in the UK. (source: [WRAP Nov 2023](#))
